## PROFILE

Computer Science Engineering student with a strong interest in technology, programming, and problem-solving. Experienced in working on academic projects involving IoT, databases, and programming. A responsible and adaptable person with a willingness to learn new technologies and improve my technical skills. Interested in building practical solutions and growing my career in the field of software and technology.

## EDUCATION

### Bachelor of Engineering- Computer science and Engineering

P A collage of engineering
CGPA: 7.2/10
year of passing : 2028

## SKILL

**Technical Skills:** C++,java, python,DSA
**Soft Skills:** Problem Solving, Teamwork, Communication, leadership
**Tools & software** : vs code , github, ms office

## PROJECTS

**Title**: **IoT-Based Weather Monitoring System**
**Role**: Team Leader
**Timeline**: 2025–2026
**Description**: Led a team to develop an IoT weather monitoring system using ESP8266, DHT11, and BMP180, with ThingSpeak for real-time remote monitoring of temperature, humidity, and pressure.

**Title: Women Safety & SOS System**
**Role**: Front-End Developer
**Timeline**: May 8
**Description**: Developed the front-end interface for a women's safety and SOS system focused on quick emergency assistance, safety awareness, and user-friendly access to emergency features.

## CERTIFICATIONS

**Title: Software Engineering**
**Organization**: NPTEL
**Description**: Learning software development processes, testing, design, and project management. Building practical knowledge of software engineering principles.
